01 Profile

Full-stack developer with 4 years building production web and mobile products: React back-offices, Node.js services on Redis, Stripe payment flows and marketing sites. I work like an architect. I plan screens and flows in Figma, define the architecture and data flow, implement with an AI-assisted workflow (Claude Code, with smaller tasks delegated to agents) and review every change before it ships. Available for freelance projects and full-time remote roles.

02 Experience

2025 - Present

Freelance · Full-Stack Developer · Remote

- **The MMAR Lab, UT Austin Marine Science Institute.** Built and maintain the research lab's website in SvelteKit, adapting an open-source static template: research, team, publications and recruiting pages, light and dark themes, deployed on Vercel. Lab members now publish their own updates. Live at themmarlab.com since 2025.

Apr 2023 - Aug 2026

Galois · Software Developer · Rome, Italy (remote)

- Designed and developed the back-office of the company's casino-games platform in React, used by 150+ clients in Europe and Asia. I built the whole client side, with a focus on UI performance and predictable state management (Redux Toolkit, MUI, Formik).
- Built data-heavy views: sortable tables, date-range filters and Chart.js dashboards, with multilingual support through i18next.
- Added APIs to the existing Node.js server and microservices (Redis, SSDB), working with the backend team.
- Built the client–server communication layer that keeps data synchronized between the back-office and the services.

Jan 2025 - Jan 2026

OnYou · Full-Stack Developer & Partner (10%) · Remote

- Managed the hybrid mobile app for 8 months (Cordova, PHP, Handlebars.js): new PHP APIs and client-side features, including a favorites system and a service-cancellation flow integrated with Stripe.
- Built the company's marketing website, onyoubr.com, in Next.js and Tailwind CSS.
- Redesigned app screens where needed, keeping the interface visually consistent.
- Automated workflows between systems with n8n, and worked across the Cordova front end and PHP back end to keep business logic and user experience aligned.

03 Project

Course marketplace. Full-stack course platform: React front end (Redux Toolkit, React Router, Tailwind), Express API on MySQL, JWT authentication, Stripe webhooks for purchases and two user-switchable themes (neo-brutalist and dark cinematic).

04 Skills

Frontend	React, Next.js, Svelte / SvelteKit, TypeScript, JavaScript, Tailwind CSS, MUI, Redux Toolkit, HTML, CSS, Sass, Bootstrap
Backend	Node.js, Express, PHP, REST APIs, Handlebars.js
Data	MySQL, MongoDB, Redis, SSDB
Mobile & desktop	Cordova, Electron
Payments	Stripe, webhooks, OAuth, n8n
Workflow	Git, GitHub, npm, Vercel, Figma, Claude Code

05 Education

700 h	**Boolean Careers.** Junior Full-Stack Web Developer
Courses	Next.js & React: The Complete Guide (Udemy, 25 h) · The Complete Web Development Bootcamp (Udemy, 65.5 h)

06 Languages

Portuguese (native) · English (fluent) · Italian (professional)
